1. This application does not contain an abstract of the disclosure in compliance with 37

CFR 1.72(b). An abstract with less than 151 words on a separate sheet is required.

2. The disclosure is objected to because of the following informalities:

on page 1, line 6, the status of US application 10/341,151 should be updated; and

on page 18, line 21, the Vol. number and No. number appear to be incorrect.

Appropriate correction is required.

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

4. Claims 21 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 21 recites the limitation "the second predetermined polarization" in line 30. There is insufficient antecedent basis for this limitation in the claim.

Claim 22 recites the limitation "the first receiver" in line 16. There is insufficient antecedent basis for this limitation in the claim.

5. Claims 1-20, 24 and 25 are allowed. The prior art does not disclose a correlating polarimeter with a modulator, a linear polarizer and a correlator as recited in the independent claims.
